Shamley Green Cricket Club: Code of Conduct

SGCC have played cricket on the village green for 168 years. Cricket is a central part of the life of the village, and the club enjoys strong local support. The part of the Green where cricket is played is referred to by many residents as the Cricket Green. Most of the residents of the Cricket Green are members of the Club.

The Green is small and from time to time balls hit houses close to the pitch and land in gardens. The Club will take the following measures to respect the interests of its neighbours and other users of the Green:

- Maintain the Club's public liability insurance and cover for third party damage and the Club's risk assessment will be updated annually and shared with Waverley Borough Council.
- Provide prior notice of fixtures by providing residents whose houses face onto the Cricket Green with a fixture card and publish the fixture list in the Parish Magazine. All Club members are sent the fixture list.
- Provide protection for the ground floor windows of those properties closest to the wicket.
- Inform residents of any damage to their property that they may not be aware of at the end of the game. Residents should inform the Club as soon as possible if they think damage has occurred as a result of the game.
- Meet reasonable costs of repair and agree with the resident concerned on arrangements for making the repair. The club will make its best endeavors to ensure that windows are repaired within 24 hours and tiles within 7 days.
- Discourage players from playing lofted shots in the direction of neighbouring houses and gardens.
- When required to do so by property owners, seek permission before retrieving balls, and as far as possible avoid damage to plants when searching for balls.
- Stop play if pedestrians walk onto the pitch, defined as the square and its immediate surrounds

The names of the senior officers of the Club are published in the monthly parish magazine, and on the SCGG Website. They can be contacted if residents have concerns.
